

BRAND IDENTITY

Hierarchy Technologies

VERSION 1.0 · 2026

INTERNAL & PARTNER USE

CONTENTS

What's in this book

01	Brand foundations	03
02	Logo system	04
03	Color	06
04	Typography	08
05	Spacing, radius & elevation	09
06	Voice & tone	10
07	Components in use	11
08	Design tokens	12

How to read this

This document is the abridged reference for the Hierarchy Technologies visual brand. The full living source — including raw token files (W3C DTCG JSON, CSS, SCSS, Tailwind preset, Dart, TypeScript) and all logo variants — lives in `branding/` in the working repository. When this PDF and that folder disagree, **the folder wins**.

Who we are, in three adjectives.

Hierarchy Technologies builds technology products with structure, clarity, and engineering rigour. The brand expression sits at the intersection of *order* and *circuitry* — captured visually by the H mark, whose terminal nodes evoke a circuit board.

Personality

TRAIT	WE ARE...	WE ARE NOT...
Structured	Ordered, deliberate, well-named	Rigid, bureaucratic
Engineered	Precise, evidence-driven, opinionated	Cold, jargon-heavy
Modern	Geometric, restrained, current	Trendy, ornamental
Confident	Direct, plainspoken, decisive	Brash, salesy
Human	Helpful, calm, respectful	Cute, ironic, cloying

Visual signature

Three things should be immediately recognisable as HT, even when stripped of context:

- **The H mark.** Geometric H with circular node terminals.
- **The brand gradient.** Azure → indigo → violet, left-to-right.
- **Wide-tracked display type.** Wordmark uses generous letter-spacing.

Audience

Engineers, technical leaders, and operators integrating Hierarchy products into mission-critical systems. They read fast and skim first; they prefer specifics over adjectives; they are skeptical of marketing fluff. Write and design accordingly.

The lockup.

The Hierarchy logo is a three-element lockup: the **H mark**, a **vertical separator**, and the **wordmark**. At small sizes, the lockup pieces drop in this order: separator → wordmark → leaving the H mark alone.

Variants

primary · default

reversed · dark surfaces

mono-dark · single-color

mono-light · knockout

mark · app icon, avatar

wordmark · paired with mark

Clear space & minimum sizes

VARIANT	MIN WIDTH	NOTES
Primary lockup	120 px / 30 mm	Below this, switch to mark-only.
Mark only	24 px / 8 mm	Below this, drop to favicon.
Favicon	16 px	Designed for this size.

Maintain clear space ≥ **1× the height of the H counter** on all sides. Nothing may enter that zone.

Misuse.

The logo is fixed art. Don't redraw, recolor, distort, or compose against it. Specific prohibitions:

- Don't recolor the wordmark or change its weight.
- Don't apply effects (drop-shadow, glow, bevel, outline-stroke).
- Don't rotate, skew, or stretch.
- Don't separate the gradient mark from the wordmark unless using the dedicated `hierarchy-mark.svg` variant.
- Don't place the gradient on backgrounds in the `azure-200..violet-200` range — contrast collapses.
- Don't crop the H mark; it relies on the four nodes being visible.
- Don't outline or fill the inner counter of the H.
- Don't use the wordmark without the mark on hero surfaces (use the lockup).

File-format picker

NEED	USE
Web, app UI, docs	<code>logos/*.svg</code>
Editable vector	<code>HT LOGO.ai</code>
High-res print	<code>HT LOGO.pdf</code>
Raster (legacy / email)	<code>1x/Artboard 1.png</code>
Browser favicon	<code>logos/favicon.svg</code>

One palette, three brand hues, one ink.

Source values come directly from the logo gradient — every other value is a perceptually-derived ramp.

Brand gradient · `linear-gradient(90deg, #4261AD 0%, #392F8E 50%, #482D89 100%)`

Brand · Azure

50 #EEF2FA	100 #DBE3F4	200 #B3C2E5	300 #8AA1D7	400 #6480C2	500 #4261AD	600 #36529A	700 #2A4280	800 #1F3266	900 #15224D
---------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------

Brand · Indigo

50 #EDEDFA	100 #DBD7F2	200 #B6AEE0	300 #8C82CB	400 #635AB0	500 #392F8E	600 #2F2778	700 #251E60	800 #1B1648	900 #110D30
---------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------	----------------

Neutral & semantic.

Neutral

Semantic

Verified contrast pairings (WCAG 2.2)

FOREGROUND	BACKGROUND	RATIO	VERDICT
text.primary #231F20	surface.background #FFFFFF	16.4:1	AAA
text.secondary #3F3F46	surface.background #FFFFFF	10.4:1	AAA
text.muted #71717A	surface.background #FFFFFF	4.6:1	AA
text.link #2A4280	surface.background #FFFFFF	8.6:1	AAA
brand.azure.500 #4261AD	surface.background #FFFFFF	5.6:1	AA
text.inverse #FFFFFF	surface.inverse #231F20	16.4:1	AAA

Sora for display. Inter for everything else.

ROLE	FAMILY	WHY
Display	Sora 700/600	Geometric sans pairing with the wordmark.
Body / UI	Inter 400/500/600/700	Industry-standard humanist sans, exceptional legibility.
Monospace	JetBrains Mono	Code, terminal output, IDs.

Type scale (1.250 — major third)

6xL · 700	Hierarchy
5xL · 700	Hierarchy
4xL · 600	Hierarchy
3xL · 600	Hierarchy
2xL · 600	Hierarchy
xL · 500	Hierarchy Technologies
base · 400	The quick brown fox jumps over the lazy dog. 0123456789
sm · 400	Helper text and table cells use this size.
mono	const tokens = require('./tokens.json');

4-pt base. No exceptions.

Spacing scale

TOKEN	REM	PX	USE
space.1	0.25rem	4	Hairline, icon padding
space.2	0.5rem	8	Inline gap
space.4	1rem	16	Default UI unit
space.6	1.5rem	24	Section rhythm
space.8	2rem	32	Card padding (large)
space.12	3rem	48	Page margins (tablet)
space.16	4rem	64	Hero block
space.24	6rem	96	Marketing hero

Radius

TOKEN	VALUE	USE
radius.sm	4px	Tags, chips, small inputs
radius.md	8px	Default — buttons, inputs, cards
radius.lg	12px	Modals, large cards
radius.xl	16px	Hero panels
radius.pill	9999px	Pills, badges, avatar wrapper

Elevation

Five-step shadow scale, all using brand ink at $\leq 15\%$ opacity for warmth. Light source top-down. Don't use coloured shadows.

Direct. Technical. Calm. Respectful.

Voice stays constant; tone shifts with context.

CONTEXT	TONE	EXAMPLE
Confirmation	Matter-of-fact	"Saved."
Recoverable error	Specific, action-oriented	"File exceeds 10 MB. Compress or split, then retry."
Fatal error	Direct, accountable	"Upload failed: server returned 503. Retry, or contact support with request ID req_8aJk3."
Empty state	Useful, not cute	"No agents yet. Create your first one to start delegating."
Marketing hero	Confident, evidence-based	"Ship faster. Your tail-end backlog, finally addressable."

Banned phrases

DON'T SAY	SAY INSTEAD
"Oops!" / "Whoops!"	(describe what happened)
"Magic" / "magical"	(the actual mechanism)
"Simply" / "Just" (filler)	(delete the word)
"Please wait"	"Loading..." or progress indicator
"Invalid" (alone)	(be specific about what and how to fix)

What it looks like in product.

Scheduled maintenance
Read replicas in `us-east-1` will failover at 02:00 UTC. No action required.

Workspace created
Your workspace **acme-prod** is ready.

Upload failed
File exceeds 10 MB. Compress or split, then retry. Request ID `req_8aJk3`.

Table

AGENT	HIERARCHY	TASKS (24H)	MEDIAN	STATUS
backlog-triage	support/tier-3	2,442	1.2 s	Live
fraud-review	billing/anomaly	418	4.1 s	Expiring
onboarding-bot	customer/new	1,201	820 ms	Live

One source. Five outputs.

Authored once in W3C DTCG JSON; consumed by every stack via the matching derivative.

FILE	FORMAT	CONSUMER
tokens/tokens.json	W3C DTCG	Source of truth
tokens/tokens.css	CSS custom properties	Web — Angular global styles
tokens/tokens.scss	SCSS variables + maps	Web — SCSS partials
tokens/tokens.tailwind.cjs	Tailwind preset	Any Tailwind consumer
tokens/tokens.dart	Dart constants	Mobile — Flutter ThemeData
tokens/tokens.ts	TypeScript constants	Web — typed access

Token categories

- **color.brand** — azure / indigo / violet, 50–900 ramps
- **color.neutral** — 0–1000 (ink at 900)
- **color.semantic** — success, warning, danger, info
- **color.surface / text** — themed light/dark aliases
- **color.gradient.brand** — canonical 3-stop gradient
- **font** — family, weight, size, lineHeight, letterSpacing
- **space** — 4-pt scale 0...24
- **radius / shadow / breakpoint / motion**

Updating

Edit `tokens/tokens.json` first, then mirror the change to derivatives. Run `preview.html` to verify visually. The full `branding/` folder is the master.
